

Handout: The Real World

Lines:

1. Find lines in the real world. Identify them either using:
 - (a) two points,
or
 - (b) point-slope.
2. Identify limitations of these analogies and explain how these real world lines are just approximations.

Parallel Lines:

1. Find parallel lines in the real world.
2. Identify limitations of these analogies and explain how these real world lines are just approximations.
